CLOSED SATURDAY AFTERNOON, Sundays & Public Holidays including Easter Saturday
DISPLAY GARDENS: Open daylight hours every day

KEY

For many years the Hybrid Tea (large flowered) roses were listed separately from the Floribunda (small flowered) sorts. However hybridists have been crossing the two types together giving us many excellent varieties with medium-sized blooms that are difficult to classify and often referred to as H.T. type Floribundas.

In the following combined list of Bush Roses we use these abbreviations:
H.T. = Hybrid Tea (large flowered);
FLORI = Floribunda (small flowered);
H.T. FLORI = Hybrid Tea Type Floribunda (medium-size flowers).

Raisers appear in bracketed capitals.
Synonyms appear in bracketed capitals and lower case.
Coloured numerals in description indicate year of release.
e.g.

SUNBLEST H.T. (TANTAU) (Landora)

1 9 8 6

TALL growers and SHORT growers are marked accordingly at end of the descriptions. Those not marked are average growers.

Normally Bush Roses and Standard Roses should be planted no closer than 760 mm-910 mm apart in the row. Allow say 1.3 m minimum between rows in a bed for working space.

FLORIBUNDAS are especially adapted to be used for low hedges and for bedding purposes. They have healthy, vigorous and bushy growth and great freedom of flowering. Where it is desired to keep them reasonably low they should be planted only 610 mm (2 feet) apart, and hard pruned each winter, leaving nothing longer than 150-230 mm (6-9 inches) from the union, then do not give them more than moderate manure and water. Where Floribundas are required to make large plants they can be planted 760-910 mm apart, pruned normally as for Hybrid Tea Bush Roses, and fed and watered liberally. Best effect is gained by using only one variety per planting but people with a small garden find it more interesting to plant a complete assortment.

INTRODUCTION

Welcome to our 94th annual rose catalogue.

1987 looks like being a great year for roses and we at Brundretts are pleased to be able to offer five exciting new varieties to add to our already extensive range.

Descriptions and hints regarding these new roses appear below and you will find colour pictures of each distributed throughout the catalogue, with our rose of the year, the aptly-named Lovely Lady, dominating the front page.

We are also offering, for the first time, a wonderful collection of old favourites as well as a choice variety of asparagus for those of you whose gardening interests extend beyond flowering plants. Asparagus plantlets may be sent to you along with your roses and/or lilacs. Cultural hints will be included with these purchases.

As many of you will know, last year we departed slightly from tradition by including photos of some of our staff, rather than the Brundrett family, on this page. This year we would again like to take the opportunity of introducing you to those of our staff you may come into contact with when dealing with us.

Readers of previous catalogues will also notice a colourful change of format. We believe this new approach will facilitate easier reading and selection. We would be grateful for any comments you would care to make on our new look.

Another new service we are offering our customers this year is the facility to charge your selections to your bank card. Please feel free to make use of this convenient method of making your purchases, the details of which appear on the order form provided.

As mentioned earlier, we are offering 11 old favourite roses that may have adorned your parents' or grandparents' gardens in years gone by. This is the perfect opportunity for those who have longed to own an old favourite that is normally no longer available.

In closing, I would like to wish you success and enjoyment from your selections and to recommend a visit to our display gardens which are always open to the public and provide a magnificent spectacle for rose enthusiasts and casual admirers alike. Our retail sales hours are listed inside the front cover, during which time our friendly staff are available to help with any queries you may have.

BRUCE A. BRUNDRETT

LOVELY LADY Dickson, Northern Ireland (Awarded Certificate of Merit Royal National Rose Society, England) [Photo front cover]
She is indeed a lovely, feminine lady and, as befits such a lady, her perfume is most becoming. The tight buds are watermelon pink and of moderate size. This colour turns to a very delicate shade when the bloom is partially open. The flowering habit is particularly prolific, so presenting quite a confection of colour on the plant. Her height is a petite 1.2 m (4 feet). These various attributes give great scope for use in the garden. She may be regarded as a decorative Hybrid Tea (large flowered type), or as a bedding Floribunda (small flowered type).

POLAR STERN (POLAR STAR) Tantau, West Germany [Photo page 8]
We welcome the long-awaited arrival of a new, full-bodied white with good form and reflexed petals. The Polar Stern bloom is indeed full-bodied having 45-50 petals, but is not so slow opening as to incur weather damage. When viewed in profile it is white, although with changing weather conditions the deeper recesses of the bloom can be various shades of cream. It is a prolific bloomer of good vigour, being 1.5 metres in height. The stems are of good length and stiff, thus preventing a hanging head. Moderately fragrant.

KAREN JULIE Allender, Victoria (Named for his granddaughter, Karen Julie) [Photo page 9]
This particularly bright, almost luminous, vermillion is a full-bodied Hybrid Tea (large flowered type) with a light fragrance that gives many blooms of exhibition type. The plant has good vigour and the height would average 1.5 metres. This beauty will be an eye-catcher in any rose bed.

NEW STAR Keisei Rose Research Institute, Japan [Photo page 9]
This is a welcome addition to the limited range of yellow Hybrid Teas (large flowered types). The mid yellow to lemon bloom has flushings of pinkish red in the cool weather. The bush is vigorous and upright in habit, with a height of 1.6 to 1.8 metres. The blooms are mostly borne singly on particularly stiff stems and have some fragrance.

ZONTA Harkness, England (Named after the ladies' service club "Zonta") [Photo page 9]
This hardy bush produces small to medium size flowers in a pale to mid yellow on large trusses. The blooms are held erect on stiff stems. For best effect allow Zonta to build up to a shrub of about 1.2-1.5 metres (4-5 feet) in height.

Mrs Val Westcott

SPECIAL OFFERS

WEEPING STANDARD ROSES

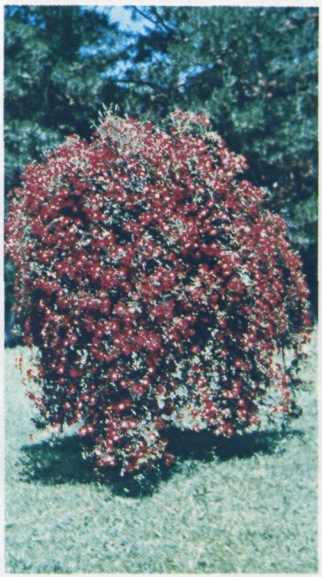
For best effect the Weeping Standard should be planted as a specimen. Staking is most important. We make available in our list of sundries pipe stakes of 50 mm diameter, pipe for 1.5 metre weepers, plus extensions for 1.8 metre weepers. Do not use timber stakes as they will break when decaying, or pipe of a lesser diameter as it will bend in the wind. The weeper stock will not bend and therefore will break.

BLOOMFIELD COURAGE
1.8 m only. Dark red single flowers with prominent yellow stamens. Many people consider this to be the most effective variety.

EXCELSA
1.8 m only. Deep pink to scarlet red, double.

NEW DAWN
1.8 m and 1.5 m. Blush pink, large double flowers in clusters. Recurrent. Very fragrant.

SEA FOAM
1.8 m and 1.5 m. White, sometimes flushed light pink, very double, produced in pendulant clusters throughout the season. This variety does not make long weeping canes but gradually build a larger head, the growth of which descends for approximately 1.2 metres on a well-established specimen. An added bonus can be had if you place it where approaching car lights will strike it.



Bloomfield Courage

Sea Foam

OLD FAVOURITES Price: $9.37 each

Do you have an old favourite that you would once more like to have in your garden? We have the following varieties available:
Comtesse Vandal (coppery salmon) 1932
Dame Edith Helen (mid to deep pink, good perfume) 1926
Daily Mail Scented(red) 1927
Gavotte (flushed pale pink, exhibition type) 1963
Lemon Chiffon (lemon yellow) 1954
Mrs Herbert Stevens (white) 1910
Mme Abel Chatenay (carmine pink, slight perfume) 1895
Rubaiyat (deep pink, very fragrant) 1946
Texas Centennial (coppery red, slight perfume) 1935
Mme Henry Guillot (salmon pink) 1938
Sir H. Segrave (cream) 1932

For the 1988 season the following 11 old favourites will be available:
Akebono
Charlotte Armstrong
Crimson Glory
Dr F. Debat
Elite
Golden Dawn
Hector Deane
Lady Hillington
Patrick Anderson
Souv De Mme Boullet
Shot Silk

The price for plants ordered from the 1988 list will be the catalogue General List Price in the year of delivery plus 22%. As these varieties are produced in small numbers it is advisable to advance order. A deposit of $4.00 per plant is required if 1-5 plants are ordered; a $20 deposit will suffice if more than five are ordered.

ROSE PLANTS IN CONTAINERS

IDEAL XMAS GIFTS

The main season for planting bare-root roses is June-July, plus Aug-Sept. We also have limited stocks of the various types of roses that can safely be planted from Oct 1st onwards. These can be collected from the Rose Farm, Monday to Friday, plus Saturday morning until noon. We **cannot** send container plants by rail or post.

THE U.K. COLLECTION

Have you friends or family in the U.K.? The well-known nursery firm of Harkness, breeders of these three popular varieties, can supply this **ideal Xmas gift** trio direct from their English nursery:
ALEXANDER RADOX BOUQUET
ELIZABETH HARK
$29.00 includes freight and a gift card to carry any special message. The despatch season in the U.K. is November-March.

B U S H R O S E S

★ *These well-proven varieties are available as both standards and bush roses. Standard roses are husky two year plants with 760 mm (30 inch) stems which are SUCKERPROOF below ground. Order varieties marked ● this season as they will not be available in our next catalogue.*

ADOLF HORSTMANN H.T. ★

Golden yellow with a glow of copper, developing to bright golden yellow. Large double flowers held erect on long stems and a vigorous healthy bush. Very fragrant.

ALEC'S RED H.T.

Clear crimson, large double blooms with wide petals. The flowers are produced most freely on good stems on a bush that is above normal for health and vigour. Very fragrant.

ALEXANDER H.T. ★

Brilliant vermillion red, a dazzling shade that greatly outshines Super Star and makes it look dull by comparison. A dependable, truly decorative variety that keeps its colour, petals and erectness, either on the bush or as cut blooms. A truly remarkable keeper. Produced on long erect stems with healthy foliage, highly resistant to mildew in spite of Super Star parentage. Usually one bloom per stem but many stems per crop. Tall grower. Very fragrant.

If it is your misfortune to have room for only a few rose plants this is a MUST!

ALL GOLD FLORI

Deep golden yellow from bud to petal drop. Free flowering in clusters. Fragrant.

ANGEL FACE H.T. FLORI

Rich deep lavender, double. Medium size H.T. type flowers produced in clusters. Moderate height. Very fragrant.

ANNE LETTS H.T.

Silvery pink, double, tight buds and firm petals, exhibition-type blooms held erect on strong stems. Very fragrant.

ANNE MARIE TRESCHLIN H.T.

Deep orange apricot, double long buds produced freely on long erect stems. The colour resembles the popular "Bettina" but the buds and stems are much longer. Tall grower. Very fragrant.

APRICOT DELIGHT H.T.

Rich deep apricot, double and of good form with broad petals and a long bud. Held erect. Fragrant.

APRICOT GEM FLORI

Rich apricot buds that develop into 63-76 mm (2½-3 inch) flowers of 30 petals in medium size clusters.

APRICOT NECTAR H.T. FLORI

Light apricot, the perfectly formed H.T. type blooms are produced in abundance, and show to perfection against the background of the shiny light green foliage. Very fragrant.

This is a firm favourite with many of our customers, as a cut rose for floral decoration. I agree emphatically.

APRICOT SILK H.T.

Rich apricot, long slender buds and attractive blooms with reflexed petals. Upright growth with long stems. Fragrant.

Although this variety has been with us for 10 years now, its sales figures are quite variable with variations of up to 50 per cent. My opinion? The choice of apricot coloured H.T.s is very limited, but this one compares favourably with the best of them.

ARIZONA H.T.

Gold, bronze and copper shades. A multi-colour, yet the changing colours are a bright new blend. A hardy, vigorous, upright plant which has high production. Very fragrant.

AVON H.T.

Rich red, double, large well-formed, long-lasting blooms which keep their colour well. Hardy and vigorous. Very fragrant.

Polar Stern *1987 Release See Intro Letter, p.3*

BARONNE E. DE ROTHSCHILD H.T.

Unfading ruby red with a silvery reverse. Double. The tightly coiled, high centered, large flowers of unusual colour attract from afar. This easy to grow rose is normally vigorous and very hardy. Very fragrant.

BEL ANGE H.T.

Light pink with deep cyclamen pink reverse. Double well-formed flowers of a most attractive shade, very freely produced on the most healthy type of plant with long stems. Fragrant.

BELLA ROSA FLORI

Salmon pink buds, 25 mm (1 inch) blooms in clusters on a sturdy plant, ½ metre (18 inches) in height. A splendid front row variety.

The more I see this variety the more I like it as a bedding or a specimen plant. You will most probably see this one getting even more attention in a later catalogue.

BETTINA H.T.

Deep orange-apricot, double. Firm, well-formed buds of medium size, good lasting quality and attractive colour. Fragrant.

BIG CHIEF H.T. (Portland Trailblazer in USA) ★

Clear bright crimson, huge blooms of 30 petals, perfect exhibition form. The startling blooms are more high pointed and larger, without being heavy, than any variety we have ever seen. Long erect stems in proportion to the blooms. A must for exhibitors and a thrill for any rose grower. Tall grower. Very fragrant.

BILL TEMPLE H.T.

Cream to creamy white, long buds and double well-formed flowers suitable for exhibition and a splendid garden rose. The blooms are held erect and produced freely. Fragrant.

BLACK BEAUTY H.T. ★

Black velvety red, medium sized but beautifully formed blooms which reflex nicely, produced very freely on long-stemmed hardy growth. Fragrant.

BLACK VELVET H.T.

Dark wine red, large double flowers borne singly. Vigorous upright growth. Fragrant.

BLUE MOON H.T. ★

Deep mauve, large flowers produced on long strong stems. One of the best in the near-blue group. Very fragrant.

BLUSHING CHEEKS H.T. (DICKSON) ★

Deep coral pink. Double blooms with exhibition attributes. Circular outlines, reflexed petals and nicely formed centre. Our tests have noted high resistance during individual periods of mildew, thrips and rain. The blooms are most attractive and produced freely on a healthy plant. Fragrant.

BOBBY CHARLTON H.T.

A blending of deep and light pinks, double high pointed blooms of excellent exhibition form and long-lasting quality are held erect on long stems and a healthy bush. Fragrant.

BOBBY DAZZLER FLORI

The colour is peach pink in the early stages developing to light shell pink. The 7 cm flowers dependably have very good H.T. form and are slow opening and produced in trusses on very healthy growth. Fragrant.

BONNIE HAMILTON H.T. FLORI ●

Bright vermilion red. Shapely small blooms of a buddy nature produced in great profusion making a grand display in the garden, while the individual blooms are most appealing. Trial Ground Certificate R.N.R.S.

BRIGHT BEAUTY H.T. (DELBARD, FRANCE) ★

Is rated tops for intensity of its deep vermillion, almost red, colour. The form when at its best is outstanding. The size of the bloom when just partly open is indeed larger than average. The plant is both sturdy and vigorous. Photo page 10.

CAMARA H.T. (DELBARD) ★

Brilliant scarlet crimson red with darker flushing on maturity. Nicely formed double blooms with good quality petals, freely produced, mainly one per stem. An outstanding deep but bright new red. Very fragrant.

CAMP DAVID H.T. (TANTAU) ★

Dusky, dark red double blooms with firm petals that are very resistant to rain damage. The plants are sturdy and free branching, and mostly produce one bloom per stem. Very fragrant. Photo page 13.

CANARY H.T. ★

Deep canary yellow, edge of outer petals lightly flushed pink. Shapely double flowers freely produced on long erect stems and a very healthy plant. Fragrant.

CANNES FESTIVAL H.T. (MEILLAND)

Blooms rich amber. Large pointed buds. 15-20 big thick petals borne usually singly, on thick long stems. Seems somewhat resistant to black spot. Tall vigorous variety.

CARLA H.T.

Light pink, double, very well-formed flowers up to exhibition standard. Strong grower. Very fragrant.

CATHERINE DENEUVE H.T.

Rich salmon pink, beautiful individual double blooms, freely produced on an upright plant of medium height with large deep green foliage. Fragrant.

CECILE BRUNNER FLORI

Salmon pink, double. The popular buttonhole rose. Small, refined buds, freely produced. This is the true dwarf form, not the extra vigorous form which produces huge trusses of probably 100 flowers which are frequently useless. For best results use as a specimen or hedge to grow 1,200 mm (4 feet). Thrives on hedge-shear pruning. Fragrant.

CHARLES MALLERIN H.T. ●

Very dark velvety crimson, large blooms produced on very long stems in moderate numbers. Tall grower. Very fragrant.

Has been in our catalogue since 1953 and I now find it has a waning popularity, mainly because of its shy blooming habit compared to more modern, dark red varieties.

Karen Julie *1987 Release See Intro Letter, p.3*

CHICAGO PEACE H.T. ★

Rich shimmering pink with a buff to silver reverse, large attractive blooms of the nature of Mme A. Meilland, from which it is a sport. Fragrant.

CHINA DOLL FLORI

Bright deep pink, double, large clusters of flowers freely produced on short bushy growth, say 300-450 mm (12-18 inches). Fragrant.

CHRISTIAN DIOR H.T. ★

Scarlet crimson, double well-formed blooms (excellent for exhibition purposes) produced freely on long erect stems. One of our best reds. Fragrant.

CIRCUS FLORI

Red, yellow, orange and pink, and ever-changing colour spectacle. Good form in bud and bloom and healthy bushy growth make this an outstanding variety. Very fragrant.

New Star *1987 Release See Intro Letter, p.3*

COCKA DOO PATIO ROSE (COCKER)

An outstanding representative of the new class of roses called "patio roses". Very bushy, compact, low and extremely free- flowering habit, having 62 mm (2½ inch) multi-petalled blooms of clear red that are delightful at all stages, including fully open. Photo page 11.

COPPER GEM H.T. (COCKER) ★

The coppery-apricot colour is quite unique and most appealing. The blooms are of medium size but beautifully formed, even up to exhibition standard, and the petals are reasonably resistant to rain damage. Fragrant. This variety is so dependably excellent that it deserved our title of "Rose of the Year for 1984". Photo page 13.

This beauty has sold out the last two seasons. We hope our still greater stocks for 1987 avoid disappointment.

CORONATION GOLD H.T. FLORI

Deep golden yellow with apricot shadings, attractive H.T. type flowers produced in profusion on a very robust plant. Fragrant.

CORSO H.T. (COCKER) ★

Pure orange flame, a beautiful bright shade not found in any other variety. The large double blooms are held erect and are slow opening with excellent exhibition form, and are long lasting in water. Rose of the Year for 1983. Photo page 14.

DEAREST FLORI

Clear, soft rosy salmon, nicely formed firm buds in clusters. Very fragrant.

DELORE H.T.

Deep cream, double well-formed blooms on sturdy long stems. Tall grower. Fragrant.

This variety was released interstate and therefore has not been brought to the attention of the Victorian fancier. This is, in my opinion, among the best cream garden roses.

DIAMOND JUBILEE H.T. ★

Deep buff yellow, very double well-formed flowers valued by exhibitors, produced very freely on a sturdy, healthy plant. Very fragrant.

DIANA H.T. FLORI (TANTAU)

Deep yellow double buds opening to 10 cm (4 inch) diameter flowers. Produced very freely on a moderate-sized but bushy healthy plant.

DICKSON'S WONDER H.T. (DICKSON)

Deep bright salmon orange, double blooms that are of a firm, slow opening, excellent keeping nature with firm weather-resistant petals and attractive form. The flowers are held erect on a strong, healthy, free-flowering plant. Very fragrant.

DOLCE VITA H.T.

Clear salmon pink, double. Noble high-pointed form with good reflexing of petals held erect on long strong stems, very free-flowering and hardy. Quite distinctive and attractive and well proved as suited for exhibition and general purposes.

DOUBLE CHARM FLORI (HARKNESS, ENGLAND)

An orange red with a lighter reverse, the blooms being long-lasting on the bush and at their most attractive when fully open. The saying that "beauty is in the eye of the beholder" is most applicable here as some people have been most impressed, whilst to some it has had very little appeal. Maybe you would like to visit us to see this one before making your decision. Photo page 10.

DOUBLE DELIGHT H.T. ★

White to cream, flushed carmine to red, long pointed buds, large double blooms with startling contrasting colours, sturdy, bushy and free blooming. Fragrant.

Zonta *1987 Release See Intro Letter, p.3*

DUET H.T.

Soft salmon pink, reverse sparkling orange-red. A very attractive colour combination, flowers freely produced on hardy, vigorous growth. Fragrant.

DUFTWOLKE H.T. (Fragrant Cloud)

Unfading clear coral red, very shapely flowers produced on strong upright stems with highly resistant foliage. Outstanding strong fragrance.

ELINA H.T. (DICKSON, NORTHERN IRELAND)

Rose of the Year for 1986. This rose astounded me when we transplanted 70 plants in a row, every plant established itself very quickly and in very short order became so dense that one was unable to see through the plant. The medium to large bloom when viewed in profile may appear to be off-white, but when looking into the bud the beautiful, very pale cream, and on occasions even lemon centre, will be admired. These shades vary greatly not only with the seasons but even day to day. Fragrant. Photo page 11.

ELIZABETH HARKNESS H.T.

Creamy white, delicately flushed, rosy amber. Nicely formed flowers freely produced on long stems, and at its best in the cooler weather of Spring and Autumn. Very fragrant.

ELIZABETH OF GLAMIS H.T. FLORI

Deep salmon, double well-formed flowers of H.T. type produced in well-spaced clusters. The colour holds well and withstands wet weather. Vigorous, compact and bushy. Very fragrant.

ENA HARKNESS H.T.

Deep rich red, nicely formed medium sized flowers that excel in the spring crop but not in mid-summer. Fragrant.

Popular on the show bench since 1951 but purely an exhibitor's rose. I would not give it garden room — try Ferry Porche or Precious Platinum.

EUROPEANA FLORI

Dark crimson, open rosette flowers in large clusters. A hardy, very free-flowering and very attractive variety. Fragrant.

EVELYN FISON FLORI (Irish Wonder)

Brilliant deep red which does not fade. Double blooms freely produced. Fragrant.

Bright Beauty 1986 Release

FANCY PRINCESS H.T. (Otohime)

Bright deep salmon-pink double. A very showy garden variety with bright shapely and showy flowers produced in profusion.

As a cut rose most appealing when almost fully open — excellent vase life AND FRAGRANT. If you grow your roses for the house include this one.

FERRY PORSCHE H.T.

Dark red, large double blooms produced on very long and very strong erect stems, hardy, fragrant.

FIRST LOVE H.T. ★

Lovely blending of soft pink and rose, semi-double, long buds with well-reflexed pointed petals, erect, vigorous, free flowering, almost thornless, hardy. An outstanding variety.

FIRST PRIZE H.T. ★

Two-toned deep rose pink double, nicely pointed buds and well formed flowers with reflexed petals. Vigorous, upright and free flowering and very dependable. Fragrant.

Most popular in the U.S.A.

FOLKLORE H.T.

Salmon with a yellow reverse. Very shapely high-centred blooms of 35-40 petals. Large healthy foliage, long strong stems with few thorns. Free flowering from early to late. Extra tall grower. Fragrant.

FRAGRANT CLOUD

See "Duftwolke".

FRANKLIN ENGELMANN H.T. FLORI

Fiery clear deep red. Nicely formed blooms of H.T. type. Produced very freely and very erect on vigorous hardy growth.

FRIESIA H.T. FLORI (Sunsprite in U.S.A.)

Bright deep yellow, nicely formed flowers and compact healthy growth. Free-flowering and very fragrant.

FRILLY DILLY PATIO ROSE (COCKER, SCOTLAND)

Many rose lovers may not yet be familiar with the classification "Patio Rose". This group is best regarded as being between Miniature and Floribunda. The blooms are usually larger than those of a Miniature Rose and sometimes equal in size to those of a Floribunda. The leaves are also of an in-between size. Whilst the height is between 30 and 60 cm, the form of the Frilly Dilly is most unique. The flowers are of the most delicate form and colour. The fully open bloom is of 32-40 mm in diameter and the petals, being 80-90 in number, are very long in relation to their width, slightly cupped and have a tendency to be stacked in columns, the length of each underlying petal being slightly greater than the one above. A small bowl of these blooms would be quite a conversation piece at any dinner party. Your home has a spot for this beauty whether it be in the garden or on the patio.

FRUITEE (MEILLAND)

A low bordering type of rose. The colour is gold deepening to sandstone red. Nicely formed, medium sized blooms with a distinct fruity fragrance. 70-80 cm in height on a compact bronzy green bush.

GINGER MEGGS H.T. FLORI

The colour of this variety is quite distinctive, we consider it to be the nearest to carrot-red we have seen. The bush is not only healthy but extremely free branching, therefore free-blooming. The flowers are attractive at all stages including fully open — 100 mm (4 inch). Fragrant.

GOLD BUNNY FLORI

The soft gold blooms are fairly large and of classic form, borne almost continuously on a compact healthy plant, singly or in small clusters on medium stems. Awards at three test gardens in Europe.

GOLDEN GIANT H.T.

Golden yellow, double well-formed blooms of excellent exhibition standard, produced on long, strong stems. A first class variety which makes a bush much taller than average. Fragrant.

GOLDRAUSCH

See "Golden Giant".

GRANDPA DICKSON H.T. (Irish Gold in U.S.A.)

Deep lemon yellow, double. Pointed buds that develop into well-formed, exhibition-type flowers with reflexed petals. Very free-flowering on a moderate sized plant, popular in every state. Fragrant.

HARMONIE H.T. (KORDES)

Salmon pink, double, free-flowering on long stems with few thorns and very attractive foliage. Very fragrant.

HEADLINE H.T.

Deep yellow, flushed carmine, double well-formed flowers which reflex nicely. Vigorous with good stems and foliage and few thorns. Definitely one of our best yellow varieties.

HELEN TRAUBEL H.T.

Salmon pink shading to apricot. A beautiful semi-double variety with braod petals that open cleanly in all weather. Long stems and hardy growth. Fragrant.

Double Charm 1986 Release

HELMUT SCHMIDT H.T. (Simba in U.K.) ★

Pure clear yellow, beautifully formed blooms on a splendid free-flowering bush. Has won many medals overseas.

We expect this to be one of our top selling yellows in a year or two.

ICEBERG FLORI (Schneewittchen)

Pure white, double flowers in long decorative sprays. Very long lasting when cut. Very fragrant.

ICED GINGER H.T. ★

The dominant colour is iced ginger on the reverse of the petal with the top side being ivory but reflecting the deeper shade. The blooms, although only of medium size, are very nicely formed and produced abundantly on long, erect stems. Highly recommended. Very fragrant.

IMP H.T. FLORI

White with petals heavily margined with red, 63 mm (2½ inch) double flowers that reach their most attractive stage when fully open. The best "novelty" variety ever. Hardy, free-flowering, and long lasting. Fragrant.

IRENE (MEILLAND)

Small shapely buds of deep cerise pink to light red in small clusters, with soft green foliage on a plant one metre high. An excellent bedding rose.

JANETTE MURRAY H.T. (BELL)

Orange pink in colour, well-formed pointed double blooms of exhibition form, freely produced on long stems with very attractive and healthy foliage. Royalties from this variety will be donated to Red Cross, of which Lady Murray is President.

JANINA H.T. ★

Deep salmon flesh with reverse deep maize yellow. Double well-formed short but firm buds, mostly singly per stem with few thorns and erect habit. Quite distinct and very fragrant.

JESSIKA H.T.

Salmon and pink shades in bud and half open bloom, developing to apricot yellow with a pink flush. Attractive double blooms produced very freely on erect stems. Fragrant.

Elina 1986 Release

JOHN F. KENNEDY H.T. ★

White, large double blooms with a high centre, borne singly and several together on strong stems and a vigorous upright bush. The blooms have very good lasting quality. Fragrant.

JOYFULNESS H.T. (TANTAU)

Pastel shades of apricot, cream and pink. Large sized blooms of very attractive shades very freely produced, usually solitary on long stems. A most welcome addition to the fancy colours list. Fragrant. Photo page 12.

JUBILEE 150 H.T. FLORI (MEILLAND)

Named for South Australia's 150th Jubilee. A most attractive addition to the fancy colour group. In shades of yellow, orange and red, increasing to deeper red on the outer petals. Viewed in profile, the reverse of the petals has a pronounced vee of red on ivory to yellow. The bloom is at its most attractive stage when the outer petals are fully open.

Frilly Dilly 1986 Release

JULIA'S ROSE

Flower arranger's delight. Long pointed buds unfold to reveal beautifully shaped flowers of an unusual blend of dull copper and parchment.

JULISCHKA FLORI

Brilliant scarlet red. 63-76 mm (2½-3 inch) flowers of 25 petals produced freely in trusses with splendid foliage that retains the suggestion of red young leaves until flowering time. The brilliant colour of the flowers stands up to extremes of wet or heat. Fragrant.

KAREN JULIE ★

Description Intro Letter, page 3. Photo page 9.

KATHLEEN O'ROURKE H.T.

Rose pink, shaded salmon. Large double blooms of noble exhibition form held erect on strong stems with large leathery foliage. Fragrant.

KENTUCKY DERBY H.T.

Dark blood red double blooms of excellent form freely produced on long stems. Colour holds well. Fragrant.

KERRY GOLD FLORI

Deep canary yellow, sometimes flushed red, medium sized double flowers which keep their colour well and are freely produced in medium to large clusters. Extremely resistant to Black Spot. Very fragrant.

KINGS RANSOM H.T. ★

Pure chrome yellow, long slender buds opening to large well-formed flowers on long stems in great abundance. Fragrant.

KONRAD HENKELL H.T. (KORDES)

Fiery dark red of approximately 35 petals, usually borne singly as an excellent garden variety having good foliage and many blooms. Very fragrant.

LADY MEILLAND H.T. (MEILLAND)

Thick petals. Clear unfading coral salmon. Long stems suitable for cutting. Some perfume. Tough mid-green foliage. Upright habit.

LADY ROSE H.T.

Shining salmon-orange with a yellow base. A very shapely bloom with a high centre and 30 or more petals. Reliable growth and splendid foliage. Fragrant.

LADY VERA H.T.

Bright deep rose pink. Very double, slow-opening, long-lasting large flowers with reflexing petals. The flowers are held very erect on longer than usual stiff stems with few thorns, and the variety has a very desirable habit of producing its blooms mostly one per stem, even on basal growths. Fragrant. Tall grower.

LADY X H.T.

Soft mauve, double. The colour is a delicate soft shade quite distinct from others in this colour group. The flowers have long, high pointed centres of pronounced spiral formation. Tall grower. Fragrant.

Cut stems 61 cm (2 feet) long and the bush will not mind — a beautiful combination in the vase with Royal Highness (which also has good stem length).

LA MARSEILLAISE H.T.

Clear deep red, double blooms produced in abundance on an extremely sturdy healthy plant.

Cocka Doo Rose of the Year 1985

LAS VEGAS H.T. (KORDES)

A very bright bi-colour of true orange and yellow. Very free-flowering from early to late.

LILLI MARLENE FLORI

Rich glowing crimson, semi-double, 75 mm (3 inch) flowers of excellent substance produced in clusters on a splendid bush. Definitely one of our most dependable red bedding roses. Fragrant.

LORD GOLD H.T. (DELBARD) ★

Deep yellow, nicely formed double blooms held erect on long stems. Tests showed high resistance to century heat. The best yellow H.T. it has been our privilege to grow. Photo this page.

LOVELY LADY ★

For description see Introductory Letter, page 3.

MARJORIE ATHERTON H.T.

Deep yellow buds opening to mid-yellow, large blooms with firm petals and good form with some of exhibition standard. Frequently borne singly, always on long, strong, erect stems. Hardiness far superior to most yellow H.T.s. Fragrant.

MATHAIS MEILLAND (MEILLAND)

A brilliant single red bloom of 18-20 petals which are attractively ruffled. An ideal bedding rose.

MARLENA FLORI

Brilliant crimson scarlet, the multitude of flowers makes a carpet of vivid colour. Highly recommended as an outstanding low growing variety for the front row or as an edging, say 300-450 mm (12-18 inches).

Special offer available, see page 6.

MEGAN LOUISE H.T.

Deep pink buds opening to lighter two-tone pink fully double blooms with excellent form. Awarded Best Australian-Raised Rose at Spring Show in Melbourne. Proceeds donated to Rose Society of Australia. Fragrant.

MERRY WIDOW H.T.

Rich unfading red, semi-double, long buds and long stems freely produced. Definitely one of the better red garden roses. Very fragrant.

Joyfulness 1985 Release

MISTER LINCOLN H.T. ★

Deep red, double, large well-formed flowers produced very freely on a vigorous and healthy plant. Tall grower. Very fragrant.

MME A. MEILLAND H.T. (Peace) ★

Yellow edged with pink, double. Very wide petals of excellent substance making a well-formed bloom of outstanding beauty. Vigorous and fragrant.

MME G. DELBARD H.T. (DELBARD) ★

Bright deep red, well-formed double blooms held erect on long stems, mostly one per stem and the flowers are highly resistant to wet weather. An outstanding variety that the long-time raiser has confidently chosen to name for his wife. Photo page 13.

MODEL OF PERFECTION H.T. FLORI

Deep yellow with an orange tint, outer petals deep cerise. Very double firm, slow-opening, 50 mm (2 inch) flowers of superb exhibition form normally found in large flowered roses. Perfectly circular outline, evenly arranged petals with superb reflex and a fine pointed centre. The flowers keep extremely well either on the bush or when cut and are produced most freely singly and in trusses on a compact hardy plant. Fragrant.

MONTEZUMA H.T.

Salmon orange, long pointed buds opening to shapely full bloom on healthy growth. Fragrant.

MOUNT SHASTA H.T.

Pure white, double, long broad petals make up an attractive long pointed bud and well-formed flowers which keep well. Free-flowering and healthy. Fragrant.

NANA MOUSKOURIE H.T. FLORI

Cream, opening to white, 100 mm (4 inch) shapely blooms in small and large clusters held erect on a very free-branching, free-flowering plant. Fragrant.

NEUE REVUE H.T. ●

Yellow to white but heavily edged with strong red, double well-formed flowers, vigorous upright growth. Fragrant.

NEW STAR ★

Description Intro Letter, page 3. Photo page 9.

NIGHT FLIGHT

See "Vol De Nuit".

NORITA H.T. ★

Black velvety red, very double, long pointed buds, long-lasting flowers and a strong healthy plant. Definitely one of the best black red varieties. Fragrant.

NORTHERN LIGHTS H.T.

Primrose yellow, sometimes flushed pink. Large double flowers of great substance and beautiful exhibition form having regularly a circular outline, evenly spaced petals that reflex well, and a fine pointed centre. The habit of growth is upright, compact, free-flowering and hardy. Very fragrant.

OLAVE BADEN POWELL H.T.

A superb rose of brilliant orange-scarlet colouring. The beautifully formed flowers are carried on strong stems and are long lasting when cut, making it a useful rose for indoor decoration as well as an outstanding rose for the garden, where it makes a healthy, free-flowering plant. Fragrant.

OLYMPIC TORCH H.T.

White petals margined pink with pink extending and deepening as the blooms open. A highly decorative and quite distinctive garden variety, having 40-45 large broad petals and a very attractive combination of colours.

OPHELIA H.T.

Soft light pink, semi-double, well-formed flowers freely produced on hardy growth. Very fragrant.

ORIANA H.T.

Bright red with silver reverse, a very distinctive and beautiful bi-colour with nice form. Very freely produced, and a most attractive and hardy garden display plant. Fragrant.

PAPA MEILLAND H.T. ★

Dusky crimson velvet, double, long pointed buds and nicely formed flowers with petals of good substance on long erect stems in moderate numbers. Tall grower. Very fragrant.

PARADISE H.T. ★

Lavender, edged with magenta-red, double, excellent form with a high centre. Produced freely on a sturdy plant. Heavenly fragrance.

Excellent — it should be as popular as it is in NSW.

PASCALI H.T. ★

White with a cream centre. Double, well-formed, slow-opening blooms produced on vigorous growth which is highly resistant to mildew and black spot. Vase life is exceptional.

PATRICIA H.T. FLORI

Clear deep salmon pink 75 mm (3 inch) flowers of 25 petals, freely produced in clusters. Fragrant.

PEACE

See "Mme A. Meilland".

Lord Gold 1985 Release

PEACH MELBA H.T. (KORDES)

Very beautiful colour of apricot bronze. Twenty or more petals, flowers nicely formed, very free-flowering with good foliage especially for such a colour. Good grower.

PERFUME DELIGHT H.T. ★

Deep pink, double, nicely formed blooms with broad petals of excellent substance which stand up well to wet conditions. Vigorous, free-flowering and tough, with strong spicy fragrance.

PETER FRANKENFELD H.T. ★

Deep rose pink, double blooms of excellent form with a high pointed centre. Large flowers, borne singly on good stems with excellent foliage and healthy growth. Very fragrant.

PINK PANTHER H.T.

Rich coral pink with a lighter reverse. A very sturdy plant producing equally hardy blooms on a moderately tall plant. Fragrant.

PINK PARFAIT H.T. FLORI

Softly blended shades of pastel pink in a most lavish manner. It produces perfect buds and lovely blooms in amazing numbers on vigorous upright growth and excellent cutting stems. The blooms, although not fully double, are particularly long lasting when cut and hold their colour well. Fragrant.

PINK SILK H.T.

Clear mid to bright pink, large double blooms of exhibition form produced freely on a healthy compact bush. Fragrant.

POLAR STERN ★

Description Intro Letter, page 3. Photo page 8.

PRECIOUS PLATINUM H.T. ★

Bright crimson, double, long pointed blooms with petals of very good substance produced mostly singly and erect on long strong stems in profusion. Glossy foliage that is highy fungus resistant. Highly recommended. Fragrant.

If your garden has room for only one red rose this beauty would be the best choice.

Mme Delbard 1985 Release

PRIMA BALLERINA H.T.

Brilliant rich rose pink, double. The blooms are large in diameter and composed of very broad thick petals of a brilliant and attractive shade that keeps well. The normally vigorous growth is remarkably hardy, and the plentiful foliage makes an excellent background for the blooms, which open freely in all weather. Prima Ballerina has been grossly overlooked but we consider it to be one of the most desirable roses available. Very fragrant.

PRINCESS DE MONACO H.T.

Ivory white with a distinct margin of carmine pink, large double blooms of exhibition form freely produced on a sturdy, healthy, upright plant. Fragrant.

PRINCESS MARGARET H.T.

Bright deep rose pink which does not fade. Thirty large broad petals form a beautiful bloom of elegant form. The plants are normally vigorous, healthy and very free-flowering. Fragrant.

Copper Gem Rose of the Year 1984

PROMINENT H.T. FLORI (KORP)

Orange red to vermilion double blooms of small H.T. type and form with a fine pointed centre and beautifully reflexed petals. Blooms held erect and freely produced. The blooms last exceptionally well and the variety is one of our real favourites. Fragrant.

QUEEN ADELAIDE (MEILLAND) (Yves Paigot)

Distinctly in the "old world" style in both colour and form. Large globular buds of lilac to pink open to large blooms of 120 mm across with an attractively ruffled appearance. A low and bushy habit with only a few thorns.

QUEEN BEATRIX H.T.

Soft salmon yellow with coppery tones, well-formed blooms freely produced on strong upright stems. Fragrant.

QUEEN ELIZABETH H.T.

Soft pink, semi-double, very free-flowering, hardy and vigorous — an ideal hedge rose. Tall grower. Fragrant.

RADOX BOUQUET H.T. (HARKNESS)

The large double warm rose-pink flowers have pronounced "old garden" charm with many petals and glorious fragrance as with the "old garden" roses of former days. An easy to grow, vigorous, healthy plant with long stems, handsome foliage and good repeat flowering. Awarded Coupe de Parfum in 1980 Swiss Rose Trials.

Special offer available, see page 7.

RED DEVIL H.T.

Deep red, with a paler reverse double. A remarkably fine red rose. The bush is ideally vigorous, bushy, free-flowering and hardy. Fragrant.

RED GOLD H.T. FLORI

There is nothing like Red Gold, a very gay colour, it is original in its merging of red into gold, each bloom on a large truss is perfectly formed and holds its attractiveness until the petals fall. A compact growing habit, well-balanced and of medium height, with attractive red and dark green foliage. Fragrant.

RED HEAD H.T. (DICKSON)

Brilliant clear red, double, nicely formed and very free-blooming. A lovely addition to the list of good reds to come from this raiser. Very fragrant.

ROMANTICA H.T.

Coral orange, quite double, usually solitary blooms on long, sturdy stems. Vigorous and healthy. A first class variety. Tall grower. Fragrant.

ROUGE MEILLAND 86 H.T. (MEILLAND)

The bright red flowers are borne on long stems of which even the thinnest are exceptionally strong and stiff. The bush is of greater vigour than average with a very dark green leathery foliage.

ROYAL DANE H.T. (Troika in Europe)

Golden apricot, flushed orange red. Very shapely double flowers of a unique and attractive blend of colours. Hardy, vigorous and free-blooming. Fragrant. Tall grower.

ROYAL HIGHNESS H.T. ★

Clear light pink, double, good exhibition form, individual blooms held erect on long strong stems which have few thorns. Recommended. Tall grower. Very fragrant.

Camp David 1984 Release

SARATOGA H.T. FLORI ●

White, medium sized, H.T.-type flowers resistant to weather. Free-flowering, hardy, vigorous and compact growth. Very fragrant.

SCARLET QUEEN ELIZABETH H.T.

Brilliant flame-scarlet, semi-double, clusters of medium sized flowers produced in abundance on an extra tall but extremely healthy bush. A wonderfully showy garden plant. A seedling from Queen Elizabeth, not a sport. Highly resistant to thrips, rain and drought. Fragrant.

This would be our most suitable tall hedge variety. Height to two metres.

SCHNEEWITTCHEN

See "Iceberg"

SCHWEIZER GOLD H.T. ●

Pure deep yellow, very double, free-flowering with good stems and foliage with remarkable resistance to disease (especially for a yellow variety). An excellent garden rose. Fragrant.

SEA SHELL H.T.

Salmon with a creamy yellow base. Lovely buds opening to large double blooms, usually one per stem. Few thorns, excellent health. Very fragrant.

SHOCKING BLUE H.T. FLORI

Large, long pointed, well-formed flowers of magenta-crimson, very freely produced on a healthy plant. Very fragrant.

SHREVEPORT H.T. (KORDES)

A difficult-to-describe colour, a rich apricot salmon with quite a bit of yellow on the reverse of the petals. Very double and free-flowering and a very healthy plant. Fragrant.

SILVER JUBILEE H.T. ★

The colour is truly a confection of pink, apricot, peach and cream and deepens during warmer weather. The freely-produced blooms are beautifully formed and the compact bush is highly disease-resistant. Fragrant.

SILVER LINING H.T.

Pale rose with a silver base, outer petals deeper rose. A beautiful, full, shapely bloom. A splendid, free-flowering, healthy plant. Very fragrant.

SIR HARRY PILKINGTON H.T.
(Melina in Germany)

Clear bright red, about 30 broad petals producing excellent exhibition-type form which holds well. A high proportion of stems have only one bloom, which is a very desirable quality. The flowers stand up to bad conditions very well, producing blooms on long stems very freely. Fragrant.

SONIA H.T. (Sweet Promise in U.K.)

Beautiful soft porcelain pink, double, nicely-formed blooms up to exhibition standard with a good centre and moderate reflex. Freely produced and dependable. Fragrant.

SPEK'S YELLOW H.T. ★
(Golden Sceptre in U.S.A.)

Deep and brilliant yellow that holds well, especially when cut young. Medium size blooms of attractive form, very freely produced. Highly recommended. Very fragrant.

STRAWBERRY CRUSH H.T. FLORI

Bright deep strawberry red in colour. 88-100 mm (3½-4 inch), nicely H.T.-formed flowers of 25 to 30 stiff petals, freely produced, of even, good quality. This reminds us of Scarlet Queen Elizabeth with better form and average good vigour instead of extreme height. A very dependable showy bedder.

SUMMER SUNSHINE H.T.

Deep yellow semi-double, long pointed blooms held erect, usually borne singly. Vigorous and hardy and also the first to bloom in spring and the best to give good blooms right up to winter pruning time. Fragrant.

SUNBLEST H.T. (TANTAU) (Landora) ★

Deep golden chrome yellow, long pointed, shapely blooms freely produced on good stems and a healthy plant. Similar to King's Ransom but the blooms are held erect. Fragrant.

SUNDOWNER H.T.

Golden-orange, large double flowers with high pointed centres and classic form, free-blooming on long erect stems. A.A.R.S. winner. Very fragrant.

Corso Rose of the Year 1983

SUN KING H.T. ★

Ochre yellow — the colour is superb in the bud and opening flowers. Large double flowers up to 125 mm (5 inches) and the petals do not become unsightly on the plant. Very free-blooming and mostly one per stem. Highly disease-resistant. Fragrant.

For a comprehensive range of colours include this one as it is the only deep yellow that does not verge on apricot.

SUNSET SONG H.T. (COCKER) ★

Coppery yellow of a unique and most attractive shade, double medium sized flowers produced in great abundance on a sturdy healthy plant. In our trials this variety deomonstrated excellent resistance against thrips and rain damage. Fragrant. Trial Ground Certificate R.N.R.S.

SUPER STAR H.T. (Tropicana in U.S.A.) ★

Pure vermilion, double. One of the brightest varieties available. Popular all over the world. Long stems, vigorous growth, and very free-flowering. In some districts rather prone to mildew but still well worth growing. Lasts well when cut. Very fragrant.

SUTTER'S GOLD H.T.

Buds ruddy gold, blooms yellow stained pink, semi-double long bud, broad petals, long stems freely produced. Excellent garden rose. Tall grower. Very fragrant.

SYLVIA H.T.

Soft shining mid-pink, the blooms regularly are nicely formed, having 40 or more petals gracefully arranged around a high centre. The growth is upright with long stems and long-lasting flowers. Very fragrant.

TATJANA H.T. ★

Fiery dark red with black velvety shadings, long pointed buds developing into well-formed blooms of noble proportions on strong stems. Very fragrant.

THE FAIRY FLORI

Rose pink, double small flowers in trusses produced freely on a low to prostrate plant. Most attractive.

TROIKA

See "Royal Dane".

TROPICANA

See "Super Star".

VIENNA CHARM H.T. ★

Coppery old gold, double. Nice long pointed blooms of good exhibition form. The colour is unique and most attractive. Tall grower. Fragrant.

VIENNA WOODS

See "Wienerwald".

VIOLET CARSON FLORI

Peach and biscuit, with a yellow reverse. The lovely coloured H.T.-type buds open slowly and are of superb form, and are produced freely on a splendid bush. A decided acquisition. Very fragrant.

VIRGO H.T. ★

Pure white, semi-double, exquisitely pointed buds and moderate sized flowers held erect on long stems. Fragrant.

VOL DE NUIT H.T. (Night Flight) ★

Clear deep mauve, double. The petals are broad and thick and the form is excellent for exhibition with reflexed petals. Held erect on strong stems and a tough bush. Without doubt the leader of this colour group. Very fragrant.

WIENERWALD H.T. (Vienna Woods) ●

Soft pink with a suggestion of salmon and deeper edge to the petals. Extra good exhibition form with a circular outline and attractive reflexing of petals. Short grower. Fragrant.

WOBURN ABBEY FLORI

Deep copper orange with yellow medium sized, semi-double flowers with nicely formed buds. The shades are very warm and attractive. Very fragrant.

ZONTA

Description Intro Letter, page 3. Photo page 9.

BUSH MINIATURES
(FAIRY ROSES)

Miniature Bush Roses $6.56 each
Standard Miniatures $12.10 each

These miniature roses have very small flowers, mostly 12-40 mm (½-1½ inches) when fully open, and usually double, well-formed buds. The habit of growth is short and bushy and they are very useful for use in rock gardens, window boxes, pots, and for low edgings, as they are fully recurrent, flowering for seven or eight months.

For potting, use a 200 mm pot minimum, and a potting mix (but not with fresh manure). OSMOCOTE is very good and perfectly safe. Liquid manure can be given to potted plants as required, but manuring should not be overdone where miniatures are grown as edgings intended to be low.

Miniatures should be hard pruned each winter, leaving only an 25-50 mm (1-2 inches), otherwise treat as a normal rose. For edgings they can be *planted 30-45 cm (12-18 inches) apart. Without* overfeeding, the height would average 30-60 cm (9-18 inches).

★ The varieties marked thus are also available as 560 mm (22 inch) standards.

AMORETTE

Creamy white, double, firm buds and fragrant flowers.

AVANDEL (MOORE) ★

A lovely blend of peachy pink and yellow. Well-formed buds and delightful open flowers with good fragrance.

BABY BETTINA (MEILLAND) ●

Clear vermilion, semi-double, bushy and very free-flowering.

BABY DARLING

Orange pink, double, bushy growth, most attractive. Fragrant.

Chatham Centennial

BABY MASQUERADE

Yellow, salmon and red. A charming colour break in this section and a splendid bush, low edging variety. Fragrant.

BABY PINOCCHIO ●

Lovely shades of pink, cream and apricot. A beautiful flower of excellent shape and substance. The colour deepens with age, finishing up almost red. Fragrant.

CHATHAM CENTENNIAL ★

A bright vermilion red with a firm bud of 38 petals. Fragrant.
The brightest variety in this list.

DOUBLE JOY

Soft coral pink, well-formed flowers, 35-40 petals and very few thorns. Free-flowering, healthy plants. Fragrant.

DREAM GLO

A well-formed bud of 35 petals. The ivory petals are flushed with a coral red that extends almost to the base of the bud. The reverse has just a very faint suggestion of this flushing.

EASTER MORNING

Ivory white, very double.

GOLD COIN ●

Pure buttercup yellow, double. The colour holds very well and the flowers are of medium size and of perfect form. The plant is bushy with quick repeat flowering. Fragrant.

GOLDEN ANGEL ★

Pure rich yellow, fully double blooms, 38 mm (1½ inches). Healthy, free-blooming and an ideal buttonhole rose. Fragrant.

GREEN ICE

White or pale pink changing to soft green in the open flower (especially in semi-shade). Free-flowering, compact and hardy.

HAPPY THOUGHT ★

Soft salmon pink, small, very double flowers produced in abundance.

HULA GIRL ★

Bright shade of apricot orange, double. 38 mm (1½ inches). Good growth and free-blooming. Fragrant.

KATHY

Light red to pink, shapely double flowers. Fragrant.

KO'S YELLOW ★

Yellow, with a deeper gold edge to the petals, double (40 petals) with classic form. Bushy and free-flowering.

LAVENDER JEWELL ★

Deep lavender, excellent colour and well-formed double flowers on a sturdy plant. Fragrant.

MY VALENTINE

Crimson red, small petalled blooms in a tight cluster with about 12 to 14 flowers out at the one time. Flower size is about 25 mm (1 inch) or less with about 50 to 60 small petals in each flower. Very free-flowering. Flowers are long-lasting either on the bush or cut.

OCARINA (Angela Rippon)

Coral pink, semi-double, dwarf and compact. Fragrant.

ORANGE HONEY

A soft honey-orange colour with a yellow base to the petals and a yellow reverse. Fragrant.

OVER THE RAINBOW

Fiery red with a yellow base on the inner face of the petals and a yellow reverse. They are lovely shaped double flowers with pointy petals, and the strong bi-colour effect is most attractive. Very free-flowering. Fragrant.

PERLA DE MONTSERRAT

Rose pink like a miniature Cecile Brunner of exquisite form. Very compact low growth ideal for a dependable low edging. Highly recommended.

RISE 'N' SHINE (MOORE)

Clear deep yellow, beautiful double buds and blooms produced very freely on a healthy plant. One of the very best yellows. Fragrant.

STARINA ★

Orange scarlet double, nicely-formed blooms produced most freely on a bushy healthy plant, ideal for edgings. Fragrant.

STAR TRAIL (MEILLAND) ★

Orange salmon, flushed orange-red with yellow on reverse. Diminutive double blooms that are really eye-catching. Photo page 6.
Awards at five trial grounds.

Double Joy

MINIATURE ROSES

STRAWBERRY SWIRL (MOORE) ★

Each double small bloom is a swirl of strawberry and cream. No two flowers alike. Buds are very lightly mossed.

SUN MAID ★

Rich golden yellow, flushed red, double blooms produced freely on strong compact plant.

Sun Maid (Standard Miniature pictured)

SUNNY MORNING

Creamy yellow with a deeper centre. Nice form, 40 petals which reflex nicely. Healthy, a good keeper, and fragrant.

THE FAIRY

See General List of Bush Roses.

STANDARD MINIATURES

Price $12.10 each

Miniature Roses grown as 560 mm (22 inch) standards. These make very attractive specimens and help to create interesting sections in a garden plan.

For varieties available see those names marked ★ in the list of Miniature Roses.

CLIMBING MINIATURES

Price $6.34 each

Growing 1-1.5 metres (3-5 feet) average.

CLG BABY DARLING

Orange pink, double. A welcome addition. Recurrent.

CLG CANDY CANE

Deep pink with white stripes, 40 mm (1½ inch) flowers in sprays. Recurrent.

CLG FIREFALL

Rich red, small double flowers produced all season in large clusters. Use as a climber or ground cover.

CLG HI HO

Deep pink to light red, double, well-formed, very free-flowering. Recurrent.

CLG LAVENDER LACE

Mauve, double, very attractive blooms. Recurrent.

CLG ORANGE CASCADE

Orange yellow buds opening to one inch blooms in profusion on willowy canes. Fragrant.

CLG OVER THE RAINBOW

Fiery red with a yellow base, and a yellow reverse, nicely shaped buds freely produced. Recurrent.

CLG RED CASCADE

A most unusual miniature climber, which has deep red double flowers about one inch across and produced in profusion. It is a splendid ground cover and will spread to around five feet in a dense mass if allowed to do so. It can be used as a dense climber, or it can be kept clipped to fill a smaller space. It will weep over walls, or make a hanging basket. Recurrent.

CLG SUGAR ELF

Small pink gold buds opening to a flower of about 10 petals and one inch across. Up to 15 inches high and a good ground cover or good for a hanging basket as well as a small climber. Recurrent.

CLIMBERS & SHRUB ROSES

CLIMBING ROSES

HUSKY TWO YEAR PLANTS

Price $7.75 each

PILLAR: Varieties marked thus are suited for growing against a post or small areas of fence, but not for tall pergolas. VIGOROUS: These are normally vigorous climbers, suited for general fence and pergola use. VERY VIGOROUS: These are the most vigorous sorts for covering extensive areas.

NOTE: Many climbing varieties do not bloom the first season.

The varieties marked thus ■ are moderately vigorous and fully recurrent bloomers, and could properly be termed "MODERN EVERBLOOMING PILLAR ROSES".

FOR FENCE COVERING: Climbers can be planted 3-4 metres (or say 10-12 feet) apart.

N.C. = Natural Climber C.S. = Climbing Sport

CLG ALTISSIMO

Bright scarlet red, single, large flowers freely produced. Recurrent. N.C.

CLG BANKSIAE LUTEA

Deep yellow fading to cream, double in clusters. A very early bloomer and most attractive. Thornless. Commonly called Banksian Yellow. (Prune after flowering.) Vigorous. N.C.

CLG BENVENUTO ■

Cherry red, semi-double, medium sized flowers with prominent centre and stamens of yellow. Very free-flowering. A worthwhile acquisition. Pillar. N.C.

CLG BETTINA

Deep orange-apricot, double, recurrent. Fragrant. Vigorous. C.S.

CLG BLACK BOY

Dark red in early stages but becomes much lighter as blooms open. Loose open flowers produced very freely earlier than most roses, making it very popular. Very hardy. Very fragrant. Very vigorous. N.C.

CLG BLOSSOMTIME ■

Soft pink with deep reverse, colours as found in "First Love". Medium sized blooms in H.T. form, in small clusters. Truly recurrent flowering and a most attractive variety. Very fragrant. Pillar. N.C.

CLG BLUE MOON

Deep mauve, large flowers on strong stems. Very fragrant. Vigorous. C.S.

CLG CASINO ■

Buttercup yellow, double, large, well-formed flowers. Recurrent. Fragrant. Pillar. N.C.

CLG COCKTAIL ■

Geranium red, centre primrose yellow, single flowers produced in clusters. Recurrent. Pillar. Fragrant. N.C.

CLG ENA HARKNESS

Deep rich red, well-formed exhibition blooms. Recurrent. Fragrant. Vigorous. C.S.

CLG GOLDEN SHOWERS ■

Rich daffodil yellow which holds well, large semi-double blooms in clusters, freely produced. Fully recurrent. Fragrant. Pillar. N.C.

CLG HANDEL ■

Cream, heavily edged deep rose-pink, semi-double, an unusual and effective climber. Recurrent. Pillar. Fragrant. N.C.

CLG JOSEPHINE BRUCE

Rich deep crimson, an excellent dark red. Recurrent. Fragrant. Vigorous. C.S.

CLG JOSEPH'S COAT ■

Yellow and red, semi-double flowers produced freely in clusters. Recurrent. Fragrant. Pillar. N.C.

CLIMBERS & SHRUB ROSES

CLG MEG

Shell pink, tinted apricot, red stamens, semi-single. Blooms up to 152 mm (6 inches) across, of superlative decorative charm. Recurrent. Vigorous or Pillar. Fragrant. N.C.

CLG MERMAID

Sulphur yellow, single (five petals). The flowers are very large, having broad petals, and the deep amber stamens stand out prominently. Recurrent blooming. Vigorous. N.C.

CLG MISTER LINCOLN

Deep red, double, large well-formed flowers. Very fragrant. Vigorous. C.S.

CLG MME A. MEILLAND

Yellow edged with pink, double. Fragrant. Very vigorous. Recurrent. C.S.

CLG OPHELIA

Soft light pink, semi-double. One of the best climbers. Recurrent blooming. Very fragrant. Very vigorous. C.S.

CLG PAPA MEILLAND

Dusky crimson velvet, double. A splendid climbing sport from the popular bush Papa Meilland. Vigorous. Very fragrant. C.S.

CLG PASCALI

White with a cream centre, double, well-formed, slow opening. Blooms produced on vigorous growth which is highly resistant to mildew and black spot. Vase life is exceptional.

CLG PAUL'S SCARLET

Vivid scarlet, semi-double. Blooms in clusters. A very brilliant climber. Occasionally blooms in Autumn. Hardy anywhere. Vigorous or Pillar. Fragrant. N.C.

CLG PEACE

See "Climbing Mme A. Meilland".

CLG PETER FRANKENFELD

Deep rose pink, double well-formed bloom. Very dependable. Vigorous. Very fragrant. C.S.

CLG QUEEN ELIZABETH

Soft, pink, semi-double, long stems and a good keeper. Very vigorous. Fragrant. C.S.

CLG ROYAL GOLD

Deep golden yellow high-centred double flowers of good exhibition quality. Recurrent. Very fragrant. Pillar. N.C.

CLG SUPER STAR

Pure vermilion, double. One of the most brilliant climbers. Very fragrant. Recurrent. Vigorous. C.S.

CLG SUTTERS GOLD

Buds ruddy gold, blooms yellow stained pink, semi-double, long buds, broad petals, long stems. Recurrent. Very fragrant. Vigorous. C.S.

CLG VIRGO

Pure white, semi-double, long pointed buds held erect on long stems. Definitely our best general-purpose white variety. Vigorous. C.S.

CLG WOBURN ABBEY

Deep copper orange and yellow and nicely formed buds. Very fragrant. C.S.

SHRUB ROSES

MOSS ROSES, OLD FASHIONED ROSES, AND OTHER CURIOUS TYPES

HUSKY TWO YEAR PLANTS

Price $8.40 each

Most of these sorts can at winter pruning be shaped with the hedge shears, after tying the long semi-climbing canes down and around and on to the bush. The result will be large bushy plants giving a wonderful display, ideal for large country gardens. After several years of such treatment a heavy winter prune leaving only a few strong young branches will rejuvenate the plant.

CONRAD F. MEYER RUGOSA

Silvery pink, large, double, shapely, recurrent. Very fragrant.

CRESTED MOSS

Clear deep pink, large very double (100-120 petals). Not so heavily mossed, but the unique, feathery, crested sepals make this a highly desirable variety. Recommended.

FRAU KARL DRUSCHKI HYB PERPETUAL

Pure white, sometimes flushed pink. Large broad petals, good form, very hardy and free flowering since 1901.

FRUHLINGSMORGEN SPINOSISSMA

Rich, cherry pink edges, soft yellow centre, maroon stamens. The most exquisite of single roses. Large maroon heps. Fragrant.

GLOIRE DES MOUSSEUSES MOSS

Deep pink, very large and full (100 petals). Heavily mossed right to the tip of the sepals. One of the best.

NEVADA HYB MOYESII

Flesh to creamy white with yellow stamens, single 100 mm (4 inch). Recurrent. Almost thornless. Large shrub or Pillar. Fragrant.

PINK GROOTENDORST RUGOSA

Deep shell pink, 40 mm (1½ inch) flowers of 30 serrated-edged petals, produced most freely in clusters. The flowers resemble carnations in their formation. Highly recommended. Recurrent.

REINE DES VIOLETTES HYB PERPETUAL

Velvety violet, double, very fragrant. Recurrent.

SPARRIESHOOP

Pale pink, single, large, in clusters. Most attractive. Recurrent.

TITIAN

Light red, double, extremely hardy. Recurrent.

VIRIDIFLORA CHINENSIS

The Green Rose. One of the curiosities of the rose world. Buds bright green and open flowers, green, slightly tinged with bronze. Free flowering. Hardy. Normal bush habit.

WHITE BATH MOSS

Pure white, large and double. Very heavily mossed. Very fragrant.

LILACS & ASPARAGUS

LILACS (SYRINGA)

Price $10.70 each

In this list we offer you a range of the modern Hybridised Lilacs, which is more comprehensive than you will find in most retail outlets. These two-year-old shrubs are quite safely shipped bare root in the same manner as the roses. For good performance from your lilacs be sure to give them a light dressing of lime each autumn and prune lightly.

ALICE EASTWOOD

Claret-pink buds opening to mauve-pink. A medium to large floret, usually of 10 petals. Medium to tall, double. Blooms mid-spring.

BELLE DE NANCY

Deep mauve in bud opening to satin-pink with a slight tinge of blue, double. Small to medium shrub. Blooms mid-spring.

CLARKES GIANT

Soft blue single. Good bushy growth.

CONGO

Rich dark purple with a slight tinge of red, single. Produced on a medium to tall shrub, an excellent purple variety. Blooms mid-spring.

CORA BRANDT

An excellent double pure white floret formation formal star pattern. A late lilac.

MADAME LEMOINE

Double white with medium size, very tight panicles. One of the best of the double whites. Compact and very free-flowering. Blooms mid-spring.

MRS EDWARD HARDING

A reddish-purple double with large semi-tight panicles. Probably the best of the dark doubles, a late lilac.

LILACS & ASPARAGUS

MISSIMO

This variety is outstanding due to the huge individual florets of 35 mm diameter. The rich royal purple is perhaps the darkest of all. Medium shrub. Blooms mid-spring.

OLIVER DE SERRES

Large loose panicles of double mauve buds opening to mauve-blue. An early lilac.

PRESIDENT GREVY

Large double panicles. Lavender pink buds opening to lilac-blue. Mid-season blooming.

Madame Lemone

PRIMROSE

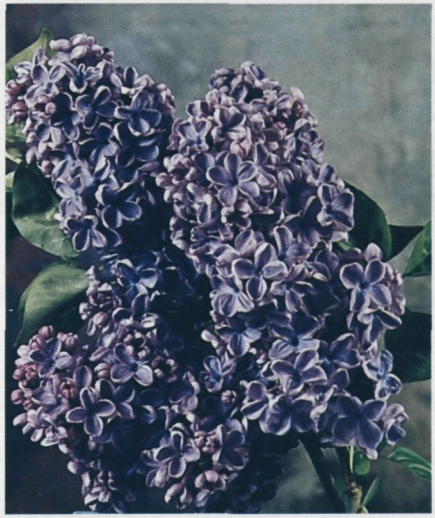
A soft single lemon colour, with just a suggestion of white. Small to medium shrub. An early bloomer.

SINGLE DARK PURPLE

Large heads of flowers on particularly bushy growth.

SENSATION

A rich purple single, each petal is edged with white. The large semi-open panicles produce freely on a medium to tall shrub. Blooms mid-spring.



Missimo

SWEETHEART

A very unusual lilac that deserves to be better-known. Double with deep dusty pink buds which open to a lovely pastel pink, making a striking contrast.

VULCAN

Ruby purple, single. A medium shrub. Late lilac.

ASPARAGUS

Price $1.00 each (Min order 4 plants)

MARY WASHINGTON

Why not have this succulent delicacy fresh from your garden? 20-30 plants suggested for family of four. Cultural hints included with purchase.

Mary Washington

SUNDRIES

As a service to fellow rose-lovers who frequently have difficulty in obtaining locally the "aids for growing better roses" that we use and recommend, we can supply these items.

STAKES for 1.525 m (5 ft) Weeping Standard 50 mm (2 inch) galvanised pipe). $23.00.

STAKE EXTENSIONS to make above stakes tall enough for 1.830 m (6 ft) Weeping Standards. (This method ensures the most economy in the cutting of lengths of piping.) $5.55.

STAKE HEADS to fit either of above. These are indispensable to make the heads of the Weeping Standards self-supporting, thus eliminating the danger of losing large plants in gale times. $8.00.

WOODEN STAKES for ordinary Standard Roses. 38 mm (1½ inches) square for strength to hold a mature plant, and 1.370 m (4 ft 6 in) long to allow say 230 mm (9 inches) of stake above the top of the standard stem. Because our standards make immense heads in a short time (given good conditions), we recommend tying the stronger branches to the top of the stake to prevent gale damage. $1.45.

SECATEURS. Skivar is a moderately priced but efficient tool that we use ourselves and can recommend. Good secateurs make pruning a pleasure. $21.00.

CUT AND HOLD SECATEURS enable you to use one hand only for cutting blooms and the other to hold the gathered flowers. An ideal gift for a rose-lover. $20.80.

OSMOCOTE FERTILISER (9 months, 18 - 4.8 - 8.3): This is a slow release fertiliser that is perfectly safe to use in the planting hole. It will not burn the roots. We have proved its worth by using it when we grow roses in containers for summer sales. It is effective for a whole season. Do NOT use any other type of fertiliser or manure at planting time. For established plants ordinary manuring methods are OK but if you wish to use Osmocote it should be dropped into a 125 mm (5 inch) hole to put it in the root zone. 1 kg sufficient for 18 plants (about two matchboxes per new plant). (One is sufficient for miniature roses.) $7.00.

TREGRAL should be used with all sprays unless the label says NOT. This makes sprays wet and cover thoroughly, even the younger foliage. 500 ml. $5.50.

KELTHANE: The most effective spray for Red Spider Mite. 500 ml bottle. $14.50.

META-SYSTOX: One spray controls Aphids for four weeks. 100 ml bottle. $10.00.

CARBARYL: To kill grubs, caterpillars and earwigs. 100 g container. $6.50.

WHITE OIL: To kill scale. 500 ml. $6.60.
To kill thrips. 100 ml. $7.00.

TRIFORINE: For black spot and powdery mildew. 500 ml. $8.00.

CHRYSAL: To prolong the life of cut flowers, packet sufficient for one litre of water. 30c ea. 10 for $2.20.

OASIS To make flower arranging easy. $1.85.

LEATHER GLOVES (PAIR): For pruning, etc. $5.00.

THORN STRIPPER: To remove thorns from cut roses. $4.60.

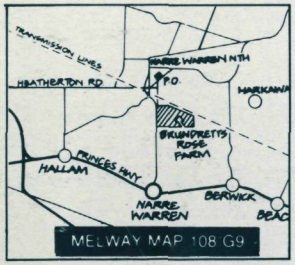
THE ROSE PEOPLE

RETAIL ROSE SPECIALISTS SINCE 1893



DISPLAY GARDENS

Our Display Gardens are open for viewing daylight hours EVERYDAY. BEST PERIODS ARE NOVEMBER-DECEMBER and APRIL. ★ Two-year-old bare root plants despatched June to September. ★ Orders can be booked in advance. ★ Container plants available for callers October onwards.

ALSO SEE OUR DISPLAYS AT:

ROSE SHOW
Melbourne Town Hall
Friday April 10, 2pm-9pm

SPRING SHOW
Late October-November
Phone us for date

1st HOME GARDENERS FIELD DAYS
Rhododendron Garden, Olinda
10-12 April, 10am-4.30pm
Melway map 66 K5

ANNUAL OPEN DAY

Our annual Open Day in aid of the **Royal Children's Hospital** is on Sunday, April 12 when the whole nursery of over 100,000 plants is available for your inspection at the peak of the Autumn blooming (10am-5pm).

CUT ROSE BLOOMS

Cut rose blooms are usually available for callers throughout the flowering season, at reasonable prices, during business hours.

IMPORTANT

Our nursery and office are closed every Saturday afternoon, all day Sundays and public holidays including Easter Saturday, but our DISPLAY GARDEN of 1,500 plants in 200 varieties is open for inspection at all times.

BEST TIMES ARE FIRST HALF OF NOVEMBER FOR THE SPRING CROP AND LAST THREE WEEKS IN APRIL FOR THE AUTUMN CROP. There is not much to see between mid-February and early April because the plants are summer trimmed to make them bloom for mid-April.

RETAIL SALES

Monday-Friday 8am-5pm, Saturday 8am-12noon.
CLOSED SATURDAY AFTERNOON, Sunday and public holidays.

TERMS OF BUSINESS

BARE ROOT PLANTS

Are ready for despatch June to September, June and July are the best planting months, but August-September are quite alright. Orders can be booked in advance.

CONTAINER PLANTS

Available from 1st October onwards for callers. These cannot be despatched.

ORDER FORM

The order form in the centre of this catalogue will be found helpful to you, and assist us in the processing of your order.

DESPATCH OF GOODS

Care should be taken that each order has the name and address of the sender plainly written upon it. Orders received before the lifting season will be reserved or despatched in rotation. Small orders can be forwarded by parcel post if preferred, and larger parcels by passenger train or air. The plants are packed well to prevent damage, and packed moist so that unexpected delays will not harm them. When no instructions are given we will choose what appears to be the most economical and convenient method for the client. Advice of despatch and invoice are posted to clients the same day as plants are sent. Clients may also CALL for plants (NOT Saturday afternoons, Sundays or public holidays).

Please do not ask us to change your order during the main despatch season, June-July.

Any additions received when your order is being processed will be treated as a separate order.

ACCOUNTS

All prices are NETT, and are based on payment within one month of date of invoice. Remittance may be made by crossed cheque, money order or Bankcard. Small accounts may be paid with Australian postage stamps.

SUBSTITUTION

When ordering, state if we may replace varieties sold out with others as good or better, and of the same colour, or add extra names from which a selection can be made to replace those out of stock. This applies particularly to late orders. WE DO NOT SUBSTITUTE UNLESS INSTRUCTED TO DO SO.

PRICES

Prices in this catalogue (which cancels all previous issues) do not include freight, cartage or postage on plants. Our prices are neither the lowest nor the highest in the profession, but we claim to have the BEST VALUE available in spite of continued inflation. We reserve the right to vary prices should conditions warrant it.

PACKING

Our packing ensures fresh arrival even if delayed in transit.

ORDERS BELOW $16.00 ATTRACT A $1.50 PACKING CHARGE. NO CHARGE MADE FOR ORDERS OF GREATER VALUE.

CONDITIONS OF SALE

We believe that all plants sold by us are of the description and kind specified at the time of sale. Where reasonable proof is given that the plants have been wrongly labelled, we will refund the original purchase money or correct the mistake by new plants; but we give no warranty, express or implied, as to their growth, description, quality or productiveness, and will not be in any way responsible for the crop, as these factors are governed by forces beyond our control. All sales are made subject to these conditions, and if the purchaser does not accept the goods sold on these terms they are to be returned without delay.

GIFT ORDER FORM

MINIMUM VALUE EACH CONSIGNMENT $20

Prior to any special occasion such as Mother's Day, Christmas, birthdays, etc, we can send your friend an attractive **gift card** conveying your greetings and intimating that your gift of rose plants will be sent to them during the planting season. When the plants are sent we will invoice the plants to you.

Please indicate names of plants to be sent, or state value that we should select for you, or mention if recipient will advise us of names of varieties required.

ROSE SOCIETY OF VICTORIA

Whether you grow 10 roses or 100, you are invited to join the Rose Society of Victoria.

Membership entitles you to the following benefits:

1. "The Australian Rose Annual".
2. A booklet prepared by Dr A.S. Thomas OBE, "Introduction to Rose Growing".
3. "The Victorian Rose News" — published quarterly.
4. A member's ticket and one transferable ticket for admission to the Spring and Autumn Shows.
5. Use of the Society's library.
6. Monthly demonstrations and lectures.
7. Social activities.

To: Subscription Treasurer, Rose Society of Victoria,
King Road, Harkaway, Vic 3806
